

Lab 7

1. Deploy HTML webpage in your ECS

The screenshot shows a Windows desktop environment. The top window is a VNC viewer displaying a terminal session. The terminal output shows the execution of 'rsync' to sync a directory from a remote server to a local directory. The bottom window is a web browser showing a search engine page with the search term 'rsync' and a list of search results.

Terminal Output (Top Window):

```
root@121401e98sgbeghuhscnav2:~# rsync -avz --recursive --no-clobber --page-requisites --html-extension --convert-links --restrict-file-names=windows --domains=website.org --no-parent https://www.w3schools.com/w3css/tryw3css_templates_restaurant_modal.htm
Both --no-clobber and --convert-links were specified, only --convert-links will be used.
